⌂ kamsahn

From building roadways and apartments to web apps and virtual worlds. I am currently studying software engineering and web development at General Assembly. I possess a passion for world building and immersive story-telling.

+ Skills

TECHNOLOGY
HTML
Bootstrap
CSS
SASS
JavaScript
Handlebars
jQuery
Ruby
Rails
SQL
Python

+ Awards

Northeastern University · Cum Laude	May 2017
Boy Scouts of America · Eagle Scout	Nov. 2011

+ Activities

Riverside Boat Club · Rower	2018 - Current

+ Projects

Tic-Tac-Toe
Built an SPA tic tac toe game using HTML5, CSS/SASS. Bootstrap, JavaScript and jQuery.
Custom game engine created with JavaScript that pits players against an AI.
Allows users to create unique profiles and play/save their own game instances.

Recipe Tracker
Built a full stack SPA for storing your online cookbook using HTML5, CSS/SASS. Bootstrap, JavaScript, Handlebars, jQuery and Ruby on Rails.
Created a PostreSQL database that stores and relates users with several other resources.
Allows users to create profiles and recipes to be saved for later use.

Team Project
one full line of description that will incorporate all the fabulous technologies that I used during the project. Probably HTML CSS and JavaScript.
Another line of description that says something about what the app does and why it's impressive
A third line that I can use to say how I worked well in a team and under stress

Capstone Project
one full line of description that will incorporate all the fabulous technologies that I used during the project. Probably HTML CSS and JavaScript.
Another line of description that says something about what the app does and why it's impressive
A third line that I can use to say this was a culmination of all my learning at GA

+ Employment
